JON-ERIK CHANDLER – WEB DEVELOPER

GENERAL INFO

Developer with more than 3 years' experience in various front- and back-end technologies, with an emphasis on React.js and Node.js. Can work reliably independently or in a collaborative environment, either in-person or remote. Excels in learning new skills and technologies and enjoys designing smooth digital experiences for others. Seeks in-person, remote, or hybrid position to further a career in web development.

TECHNOLOGIES

HTML5, CSS3, Stylus, React.js, Next.js, Node.js, Koa.js, Git, MySQL, Sequelize, REST APIs, PugJS, Easypost, Google Analytics, Stripe, MailChimp, Grafana

EXPERIENCE

iCompute Consulting – *Tallmadge, OH, September 2018 – present (3 years +)*
- Design and build custom applications in a collaborative, hybrid work environment for a start-up web applications firm
- Manage relational databases both through written queries and ORMs
- Work with commercial third-party APIs and services
- Work on front- and back-end tasks
- Research and integrate new technologies through Node.js modules
- Contribute and manage code base changes through Git

APPLICATIONS

Power Tool Repair Ohio – *Commercial application in Node.js, React.js, and Next.js*
- Collaborated on the design and implementation of a full stack commercial application with relational database back end, internal business application, and public-facing online store
- Worked closely with client's needs and specifications to streamline their sales and service workflow through custom-designed software
- Helped integrate third-party services for payments (Stripe), commercial shipping (Easypost), and ecommerce web traffic analysis (Google Analytics)
- Set up business analytics through Grafana dashboard

Task Management Application – *Web application for scheduling, time keeping, and billing*
- Helped determine logic and design layout of front-end only web application in React.js
- Worked closely with lead developer to incorporate specific features and functionality
